

Want a Cooler Home this Summer?

(and a warmer home next winter?)

CSI's **FREE** Weatherization Program can help you!

Why Weatherize?

- *saves over \$400/year on utility bills
- *It is FREE for households with low to moderate income levels.

What is Weatherization?

(Here are some services available based on your home's or apartment's unique needs.)

- *Repair, tune-up or replacement of furnaces
- *weather stripping
- *replacement of old light bulbs to new efficient types
- *insulation of hot water tanks, walls, floors and attics

So, Who Qualifies?

As with most programs, certain income guidelines must be met. To encourage weatherization as a solution to high utility costs, the program's participation guidelines are more generous than most. For example, a single person can make \$21,780 and a family of four (4) can make \$44,700.

Flip this card OVER to see if you qualify for assistance to save money on utilities!
